

Ethicon Physiomesh® Removal from the Market

June 7, 2016

Dear Valued Customer,

Recently, Ethicon, Inc. announced the removal of its Physiomesh Flexible Composite Mesh line of products from the global market.

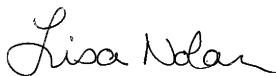

In light of this removal and in an effort to minimize any impact on patients, Maquet Medical Systems USA/Getinge Group (formerly Atrium Medical Corporation) is positioned to support your product needs with our C-QUR MOSAIC® Mesh product line. C-QUR MOSAIC Mesh features bio-absorbable C-QUR® Omega-3 fatty acid (O3FA) coating with a monofilament polypropylene mesh design for open and laparoscopic hernia repair when a tissue separating layer is needed. C-QUR family of mesh has the only O3FA coating composed of lipids, fatty acids and glycerides.

MOSAIC Mesh is offered in additional sizes and shapes to address a broader variety of ventral hernia defects as demonstrated on the attached Product Cross Reference.

Developed through more than 45 years of experience in textile graft and knit technology, Getinge mesh is designed with advanced materials for optimal surgical performance and patient outcomes.

Please let us know how we can assist during this disruption by contacting your local Maquet/Getinge Biosurgery Sales Representative; or call Customer Service at 1-800-528-7486.

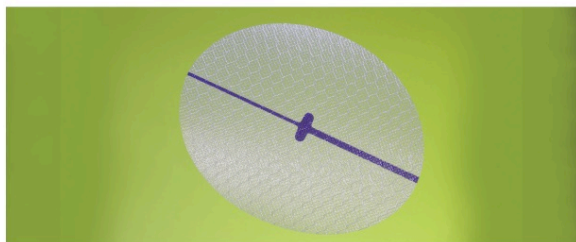

Sincerely,

Lisa Nolan
Vice President of Marketing
Acute Care Therapies
